MEMORANDUM FOR: Director of Data Processing

25X1A

FROM : [REDACTED]
Director of Communications

SUBJECT : IBM Systems 3, Software Support (U)

1. (C) An IBM Systems 3, Model 4 disk-based computer system is in use at the Agency cryptographic repository at [REDACTED]. This system is dedicated to the COMSEC accounting process within the Agency. The operating software has been written by personnel assigned to the repository with training in RPG II and with advice and guidance of [REDACTED] Systems Engineers.

2. (U/AIUO) While the system is now operational, there are several complex features that are needed and planned. However, the level of activity in the COMSEC Accounting and Distribution Section has been too great to allow further progress in software development. [REDACTED] representatives have informally stated that there is little possibility of [REDACTED] programming assistance until fall due to other commitments.

3. (C) Your support and assistance is requested to provide additional programmer support within thirty days to help address immediate problems and secondly, to develop an ongoing software support mechanism which we can call upon when added resources are deemed necessary. Specific questions regarding this request may be directed to [REDACTED] who can be contacted on green [REDACTED]
